1 Document authoring, markup and manipulation 1: Classifying XML tags through   ◼
◈ "reading contexts"
Xavier Tannier, Jean-Jacques Girardot, Mihaela Mathieu
November 2005 **Proceedings of the 2005 ACM symposium on Document engineering DocEng '05**
Publisher: ACM Press
Full text available: 🔲 pdf(113.82 KB)   Additional Information: full citation, abstract, references, index terms

Some tags used in XML documents create arbitrary breaks in the natural flow of the text.
This may constitute an impediment to the application of some methods of document
engineering. This article introduces the concept of ``reading contexts'', and gives clues to
handle it theorically and in practice. This work should notably allow to recognize emphasis
tags in a text, to define a new concept of term proximity in structured documents, to
improve indexing techniques, and also to open up the way to ...

2 WebSplitter: a unified XML framework for multi-device collaborative Web browsing   ◼
◈ Richard Han, Veronique Perret, Mahmoud Naghshineh
December 2000 **Proceedings of the 2000 ACM conference on Computer supported cooperative work CSCW '00**
Publisher: ACM Press

Full text available: 🔲 pdf(200.60 KB)   Additional Information: full citation, abstract, references, citings, index terms

WebSplitter symbolizes the union of pervasive multi-device computing and collaborative
multi-user computing. WebSplitter provides a unified XML framework that enables multi-
device and multi-user Web browsing. WebSplitter splits a requested Web page and
delivers the appropriate partial view of each page to each user, or more accurately to
each user's set of devices. Multiple users can participate in the same browsing session, as
in traditional conferencing groupware. Depending on the acc ...
